

ASCM Professional Development Dinner Meeting

Tuesday – April 18, 2023

Presenter – Amy Sartain, Sunland Logistics

“Warehouse Layout Design”

Bio:

Amy earned her BS of Industrial Engineering from Clemson University while participating in the Cooperative Education program with companies like AFL Telecommunications and Milliken.

For the first several years of her career Amy was an Industrial Engineering Project Manager designing eCommerce fulfilment centers for Walmart.com and traveled the country to start up 5 new locations. As a change of pace, Amy joined the 120 year old Manufacturing company, Crayola. As part of the Continuous Improvement team, Amy worked with teams in Manufacturing, Logistics, and Supply Chain departments to implement Lean Six Sigma best practices. For the past 5 years, Amy has worked for Sunland Logistics Solutions. Sunland is headquartered in Simpsonville, SC and was recently recognized as the 6th fastest growing company in South Carolina. As a part of her role, Amy gets to work with 50+ clients per year to design solutions to improve warehouse operations.

Presentation Overview:

- Why having a detailed accurate warehouse layout is important
- How to design an efficient and optimized warehouse layout
- How to monitor warehouse space utilization ongoing
- Resources that are available to help with warehouse designs and layouts
