

March 21, 2023 - PDM

State of Recycling in the Carolinas, with an added view towards Lithium-Ion batteries.

Presenter:

Wes Westbrooks, Senior Waste Logistics Specialist, BMW Manufacturing Co. LLC

Bio

I have been with BMW for the past 20 years. I have managed the Waste Logistics department for 18 of those years. My main task is to maintain the plants Environmental Sustainability targets which are given to us by BMW AG in Munich. This includes all areas of the manufacturing plant and the performance center. One of our biggest achievements is taking the plant landfill free in 2012. We are still striving and working daily to improve.
